LETTER OF DEFICIENCY# WSEB 02-122
Certified Mail#7099 3400 0003 0692 3065

Subject: Greenfield - Public Water System: Carbee's Corner (EPA #0976030)

Dear Mr. Carbee

The records of the NH Department of Environmental Services (DES) show that the Carbee's Corner water system is classified as a public water system (PWS), as defined by RSA 485:1-a. A PWS is defined as any water system supplying 15 or more services, or 25 or more people for 60 or more days per year. As such, the water system owner is required to submit chemical samples according to the system's established sampling schedule to the State laboratory or a State-certified laboratory in compliance with NH Administrative Rule Env-Ws 326. Pursuant to Env-Ws 351, the failure to submit a chemical sample within the assigned sampling quarter requires that public notice of such failure be given to all consumers.

DES records show that the subject water system failed to submit the following chemical sample result for the following monitoring period (calendar quarter).

Quarter 2 – 2002 – Nitrate

DES believes the monitoring/reporting deficiency can be addressed by taking the following actions:

- By September 20, 2002**, submit the Nitrate sample as a "make-up sample" to the State laboratory or a State-certified laboratory. Please use the enclosed analysis result form when submitting the sample to your laboratory.
- 2. By September 20, 2002**, provide public notice of the failure to submit the Quarter 2– 2002 Nitrate sample, as specified on the enclosed form; and
- 3. By September 30, 2002**, provide proof of public notice to DES, as specified on the enclosed form.

In the event compliance is not achieved within this period, DES may take further enforcement action. These actions include issuing an order requiring the deficiencies to be corrected, initiating an administrative fine proceeding, and/or referring the matter to the NH Department of Justice for imposition of appropriate penalties.
